## Precise BioMatch Mobile integrated in Notebook from a leading Taiwanese vendor

Precise Biometrics' algorithm solution for fingerprint recognition in mobile devices, Precise BioMatch™ Mobile, has through cooperation with Elan Microelectronics been integrated in a Notebook from a leading Taiwanese vendor.

The integration will generate royalty revenue starting from the second quarter 2016. Royalty revenues are based on the number of sensors Elan microelectronics delivers to the device manufacturer and cannot be forecasted.

*"We are very pleased to be integrated in this flagship device, from one of the top 5 Notebook brands worldwide, through our collaboration with Elan microelectronics who is the global leader in notebook IC's. Precise Biometrics fingerprint software is integrated in products from over 30 vendors and has become the preferred choice to ensure a superior user experience and secure identity verification on mobile devices", says Håkan Persson, CEO of Precise Biometrics.*

Precise BioMatch Mobile is the industry leading algorithm solution for convenient and secure fingerprint recognition on smartphones and tablets. The unique and patented hybrid algorithm solution is optimized for small fingerprint sensors and platforms with limited processing power and memory space. Precise BioMatch Mobile offers fast, accurate, and secure verification of user's identity, creating a convenient user experience when unlocking mobile devices or authenticating to services.
