

Clarification to Precise Biometrics' press release from July 5, 2013

Changes to the text are found in the headline, in the preamble, as well as in the statement from CEO Thomas Marschall.

Precise Biometrics receives orders with a total value of SEK 9.9 million

Precise Biometrics has received orders for hardware with a total value of SEK 9.9 million. The orders are follow-up orders from an existing customer in the Middle East. The delivery of the orders is split between Q2 and Q3 2013. SEK 6.5 million of the orders was delivered in Q2.

The delivery consists of Precise Biometrics' 200-series readers, combined fingerprint and smart card readers that will be used in a current government ID card project together with the Precise Match-on-CardTM technology.

The government is an existing customer of Precise Biometrics since 2004, when the company delivered the first volume order of fingerprint readers. Since then, Precise Biometrics has supplied fingerprint readers on a regular basis.

Thomas Marschall, President and CEO of Precise Biometrics, says: "It is very satisfying to see that this customer is so pleased with our products that they keep returning. Although our primary focus is on our Mobile business unit and Tactivo, we still believe that we will continue to see sales developing within our IAM business unit. The IAM business, not only includes the fingerprint readers as in the orders from the customer in the Middle East, but also licenses and algorithms."

Precise Biometrics AB (publ) may be required to disclose the information provided herein pursuant to the Securities Markets Act. The information was submitted for publication at 11:30 am on July 8, 2013.
