

Precise Biometrics showcases biometric physical access ISC West together with Avigilon

Precise Biometrics, a global pioneer in biometrics and cybersecurity, has partnered with Avigilon – a Motorola Solutions company and a leading provider of video security and access control solutions – to showcase its biometric physical access solution, Precise Access, at ISC West in Las Vegas. Seamlessly integrated with Avigilon’s security suite, the solution delivers high security combined with an unrivaled user experience. It will be demonstrated in the Avigilon Motorola Solutions booth, illustrating how biometrics can be embedded as a natural layer within modern, cloud-connected physical security architectures.

At ISC West in Las Vegas, March 25–27, visitors can experience how biometric authentication using facial and palm recognition integrates with Avigilon’s Alta Access control system to create a modern, cloud-connected physical security solution with built-in multi-factor authentication (MFA). The solution enables organizations to move beyond keys, cards, and PIN codes, while strengthening security and simplifying everyday access for users.

The integrated solution supports use cases ranging from office and workplace access to critical infrastructure and high-security environments. By combining Precise’s biometric authentication expertise with Avigilon’s robust physical security ecosystem, organizations can deploy scalable, future-ready access solutions that deliver robust security without compromising usability.

Joakim Nydemark, CEO of Precise Biometrics, commented:

“Partnering with Avigilon and showcasing our integrated solution at ISC West is an important milestone for Precise. By combining our biometric authentication technology with Avigilon’s strong security platform and global partner network, we enable organizations to strengthen physical access security without compromising user experience. This collaboration clearly demonstrates how biometrics has become a natural and seamless part of modern, cloud-based physical security architectures.”

About Precise Biometrics

Precise Biometrics AB (publ) (“Precise”) is a global pioneer in biometrics and cybersecurity. The offering includes algorithm products for fingerprint, facial, and palm recognition, along with turnkey solutions for visitor management (Precise Visit by EastCoast) and biometric physical access (Precise Access).

Our premium solutions enable secure and seamless access to data, mobile devices, premises, and trusted identities. Key focus areas include biometric authentication for mobile phones, laptops, security keys, logical access, vehicles, government biometric programs, as well as enterprise solutions for visitor management and biometric physical access.

Precise operates through two business units, Digital Identity and Biometric Technologies, and the company has offices in Sweden (HQ in Lund), the US, South Korea, Taiwan, and China. Precise is a public company listed on Nasdaq Stockholm (PREC). Learn more at www.precisebiometrics.com.
