

Precise expands Precise Visit with integrated queue management

Precise Biometrics, a global leader in biometrics, with trusted solutions for access, and identity management, continues to expand Precise Visit by EastCoast with the launch of integrated queue management. The new functionality broadens the platform beyond traditional visitor management and is part of Precise's strategy to create a more connected solution for managing visitors, providing secure and seamless physical access, and related services.

The new functionality enables organizations to manage visitor registration, queues and visitor flows through a single cloud-based solution. Visitors can register on arrival, receive a queue number and be directed to the right service or contact, while administrators gain a real-time overview and can manage queues and visitor flows directly within Precise Visit.

By bringing visitor and queue management together, organizations with or without manned receptions can simplify administration, improve visitor flows and create a more seamless visitor experience. The launch is part of the continued development of Precise Visit into a broader platform connecting visitor registration with physical access, security and other business processes.

Joakim Nydemark, CEO of Precise Biometrics, commented:

"We see a clear opportunity to expand Precise Visit beyond traditional visitor management and address more of the processes surrounding the visitor journey. Queue management is a natural extension of the platform, helping customers improve both operational efficiency and the visitor experience. At the same time, it increases the value of Precise Visit for our existing customers and opens up new use cases and commercial opportunities."

Precise Visit is used by more than 800 organizations across the Nordic region and Europe.

About Precise Biometrics

Precise Biometrics AB (publ) ("Precise") is a Swedish-rooted global leader in biometrics, providing trusted access and identity solutions that securely verify and identify people across physical and digital environments.

Guided by our vision of making everyday life safer and more seamless in a world where YOU are the key, we combine biometric hardware systems, algorithms, cloud solutions, and decades of domain expertise to help protect identities, places, devices, data, and digital services against fraud, identity threats, and unauthorized access. Applications range from mobile phones and consumer electronics to physical and logical enterprise access, visitor management, and government identity programs, powering hundreds of millions of devices and authentications every day.

Precise has a strong global presence with local teams across Europe, North America, and Asia. The company is headquartered in Lund, Sweden, and is listed on Nasdaq Stockholm (PREC).
